Osama Ammar Othman

.NET Full-Stack Developer

Riyadh, Saudi Arabia | +966 53 003 1266 | osamaammarothman@gmail.com
linkedin.com/in/osamaaothman | github.com/Osamaaaothman | Jordanian Nationality | Valid Saudi Work Visa

Summary

Computer Engineering graduate and .NET Full-Stack Developer specializing in ASP.NET Core Web API and React. Experienced building and shipping production systems end to end — from relational database design to secured REST APIs and responsive React frontends. Strong command of Entity Framework Core, LINQ, Dependency Injection, AutoMapper, and the Repository Pattern within N-Tier architecture. Holds a valid Saudi work visa.

Experience

.NET Full-Stack Developer, Internship **06/2025 – 12/2025**
True Time Solution — truetime.ps *Ramallah, Palestine*

- Delivered an e-commerce platform with integrated ERP modules as the sole developer over a 6-month engagement, owning database design, backend, and frontend end to end.
- Designed and implemented 40+ RESTful endpoints using ASP.NET Core Web API, structured in a 3-layer N-Tier architecture separating Presentation, Business Logic, and Data Access.
- Modeled a 12-table relational schema in SQL Server and built data access with Entity Framework Core, applying LINQ for filtering, aggregation, and reporting queries.
- Applied the Repository Pattern with built-in Dependency Injection across all 12 entities, and used AutoMapper for DTO-to-entity mapping to keep controllers thin.
- Secured the API with JWT authentication and role-based authorization covering 3 user roles (Admin, Seller, Customer).
- Built the React frontend consuming the API, delivering 10 responsive screens backed by reusable components.

Full-Stack Developer, Graduation Project **02/2025 – 06/2025**
An-Najah National University *Nablus, Palestine*

- Built an e-learning platform supporting course management, quiz generation, and student dashboards across 4 distinct user roles (Instructor, Academy Manager, Student, and User).
- Developed RESTful APIs with Node.js and Express over a 23-table MySQL database managed through Sequelize ORM.
- Integrated the OpenAI API to auto-generate quiz questions from course content, removing manual question authoring for instructors.
- Implemented the React frontend using a reusable component architecture to accelerate feature delivery.

Projects

AI Maze Solver **github.com/Osamaaaothman/AI-Maze-Solver**

- Built an end-to-end machine learning pipeline covering dataset upload, model training on an 80/20 train-test split, and performance visualization, with an interactive React frontend.

Technical Skills

Backend: ASP.NET Core Web API, C#, .NET, REST APIs, Node.js, Express.js, JWT Authentication, Role-Based Authorization

Databases: SQL Server, Entity Framework Core, LINQ, Relational Database Design, MySQL, MongoDB, Sequelize ORM

Architecture & Patterns: N-Tier Architecture, Repository Pattern, Dependency Injection, AutoMapper, DTOs, SOLID Principles

Frontend: React, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, Responsive Design

Tools: Git, GitHub, Visual Studio, Postman, Vite

Education

Bachelor of Engineering in Computer Engineering **09/2021 – 01/2026**
An-Najah National University *Nablus, Palestine*

Certifications

Front-End and Back-End Web Development, 200 Hours — Knowledge Academy

Machine Learning Fundamentals, 60 Hours — The Hope International

Languages

Arabic — Native | English — Professional Working Proficiency
